PERSONAL PROJECTS

Chatbot For Government Engineering College Rajkot

- Currently developing a Chatbot for students where they can get all the information about GECR and they get all the study material of all semester. The data is available in quantity but student didn't get directly what they want. Therefore chat bot will bring all these data at one place.
- Creating using Python and Telegram API.

College Website

- I developed a College website having multiple pages of details about the college, faculty, courses, etc.
- I developed this website using HTML, CSS and Bootstrap.
- Link: <https://satishchau.github.io/collegeWebsite/>.

Text Utility

- It is simply a set of utility functions to do operations on String objects.
- Created using python and Django Framework.
- link: <https://github.com/SatishChau/TextUtility>.
